
TVAC40850

Cat 5 cable 20m

This network cable is used to connect your network camera e.g. to a router or PC. The cable with a twisted pair of wires (twisted pair cable) is available in different categories. Category 5 (CAT 5) is used for wiring IP camera and computer networks, such as fast ethernet. Thanks to this, high data transfer speeds of 100–MBit/s are guaranteed. The CAT 5 network cable is available in a length of 20 m (TVAC40850), 10 m (TVAC40840), 5 m (TVAC40830), 3 m (TVAC40820), 2 m (TVAC40810) and 1 m (TVAC40800).

Product highlights:

- To connect network cameras to e.g. routers and PCs
 - RJ45 plug incl. anti-kink sleeve
 - Use in multimedia networks and telephone systems
 - Suitable for use with ABUS IP cameras
 - 8-pin RJ45 connections
 - Length 20m
-

TVAC40850

Cat 5 cable 20m

Technical Data

Type of cable Cat 5e

Outer insulation PVC

Area of use Indoor areas

Outer diameter 5.2mm

Connections 8-pin RJ45

Operating temperature -10 – +60

Insulation HDPE

Length 20m

Insulation resistance 5000M/KM
